

# Eden Global Natural Resources UCITS ‘Light Green’ ESG Fund Monthly Fact Sheet – March 2022

5 April 2022

## Investment objective – long term growth by investing in natural resource companies

The Eden Global Natural Resources UCITS ‘Light Green’ ESG Fund’s (the “Fund”) objective is to achieve long term growth by investing in natural resource companies. The Fund will invest on a long only basis in equities and equity-related securities, including preference shares and convertible bonds involved in the development of natural resources

## ESG – classified as ‘Light Green’, under Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR)

ESG considerations are core to the investment process, and potential investments which do not meet required ESG measures will be excluded from the Fund’s investment universe. Eden employs a combination of negative/exclusionary screening, positive/best-in-class screening, ESG integration, and corporate engagement plus shareholder action. Eden takes an active approach to ESG to drive transformational and positive change within the global natural resources sector. The Fund focuses on investments that assist to drive the transition of the global economy to a more sustainable basis. As such, the Fund excludes fossil fuels from its strategy as part of its exclusionary ESG approach, which includes the production of thermal coal, oil, gas.

Market capitalisation currency in AUD

### Fund manager comments

- The Eden Global Natural Resources UCITS 'Light Green' ESG Fund (GBP NAV) increased by c. 12.45% during the month of March 2022. Since inception, Fund (GBP NAV) cumulative performance as at 31/03/2022 is c. +13.38%
- Global equity markets recovered strongly during March, following the significant market retreat due to the events surrounding the Russian invasion of Ukraine in late February
  - The Russian-Ukraine conflict resulted in surging commodity prices, exacerbating the surge in inflation globally and supply chain disruption. The impacted regions are major producers of energy (oil & gas), and metals such as nickel, copper, iron, palladium, platinum and agriculture commodities, such as wheat and corn. This highlights the supply shortage across most commodities
  - Additionally, the conflict has encouraged a refreshed push for alternative sources of energy, such as renewables and EVs
- Earlier in the month, there were concerns regarding a slow down in Chinese growth and fresh COVID-19 Omicron related lockdowns, the impacts that this may have on supply chains as well as industrial related commodities
- As at 31 March 2022, the Fund held 41 equity positions and cash of c. 3.49%
